MEMORANDUM FOR: Chairman, Committee on Imagery Requirements and Exploitation

ATTENTION : Chairman, Imagery Collection Requirements Subcommittee, COMIREX

SUBJECT : Request for Domestic Coverage, Rio Grande Hurricane-Damaged Area

1. "Project Argo", organized by the Scientific Adviser to the President to investigate the peaceful uses of satellite photography, has requested KH-4 coverage of the lower Rio Grande Valley area recently damaged by Hurricane Beulah, part of which has been declared a disaster area by the President. Coverage is requested during the present month; although flood waters may have receded, evidences of damage would still be visible and there would still exist a requirement for study.

2. The area requested is a block described by the following coordinates:

97°05'W to 98°30'W longitude
25°50'N to 26°35'N latitude

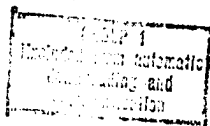

3. It is recommended that if the request does not vitiate intelligence requirements, coverage be collected by the next scheduled J mission (1044).

Assistant for Operations, NPIC
